

MICROFLUID

**REPLECEMENT SPARE PARTS
& SERVICE**
FOR HIGH-PRESSURE HOMOGENIZERS

www.microfluidprocess.com

ABOUT Microfluid

We Microfluid process equipment customer focused engineering company that focused on helping various industries such as dairy, food & beverages, chemical, pharmaceuticals & biotech, home & personal care to develop and supply high precise replacement spare parts for high-pressure homogenizers and provide service contracts for various make with highly precise quality on reasonable cost.

Microfluid process equipment was founded in 2020 by highly qualified engineers, who have more than 25 years of experience in design & development and manufacturing of high-pressure homogenizers, high-pressure reciprocating plunger pumps, centrifugal pumps and many more products in manufacturing and process industries.

And Many More Makes...

QUALITY

Microfluid process equipment understand the value of your expensive homogenizer machines, so highly precise spare parts must be recommended for high-pressure homogenizers.

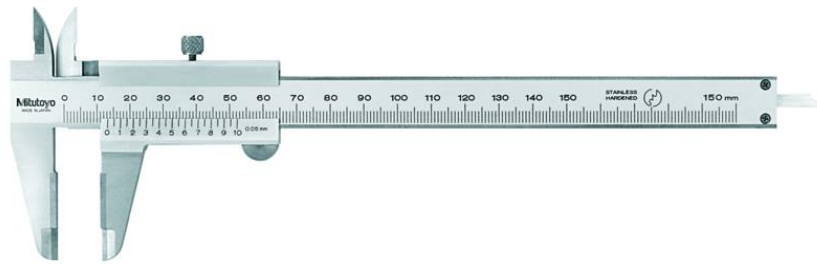

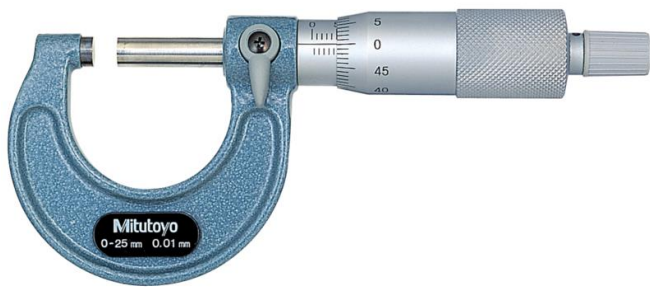

The high-pressure homogenizer is much precise engineering equipment. We know the proper operation of this equipment in your process and we understand the importance. That's why we deliver our experience and knowledge to make your process smoothly, using Microfluid's accurate spare parts.

- Follow right engineering methods
 - Maintain all types of GD&T
- Maintain surface roughness & hardness
 - Maintain close tolerances

QUALITY

Microfluid process equipment used only highly accurate measuring instruments for inspections finished spare parts. We regularly calibrated instruments for precise results.

We maintained all types GD&T parameters, surface roughness, hardness and close tolerances for better performance.

CUSTOMER FEEDBACK

➤ Havmor Performance Certificate

From: Naranbhai Karamta <naranbhai.karamta@havmor.com>
Sent: 22 April, 2021 3:20 PM
To: 'Parth Patel'
Subject: Performance Certificate - Havmor Ice Cream to Microfluid Process Equipment

Date: 19th April-2021

To,
Microfluid Process Equipment,

Performance Certificate

Havmor ice cream is a leading producer of ice creams, candy, cones and many other ice cream products.

We are using SPX flow technology high pressure homogenizer (Serial No.: J2-15-179, 5000 LPH Capacity & 235 Bar Pressure) for ice cream application.

We have purchased replacement spare parts, homogenizing valves and valve seats from **M/s. Microfluid Process Equipment** before six months ago.

We wanted to appreciate for the superb quality and excellent performance. We would like to inform you that we are getting outstanding performance of spare parts from last six months and we are very satisfied with the performance of spare parts and its quality.

Based on our experience we can say that no any other Indian manufacturer of spare parts of homogenizers can match the Microfluid's terms of quality on very reasonable rate and fast delivery.

We wish you all the very best for the future endeavour and business expansions.

Thanks & Regards
NARANBHAI KARAMTA
Manager Engg.

APPLICATIONS

Dairy

- Milk Pasteurized & Processing
- UHT Milk
- Milk for Yoghurt
- Yoghurt Drinks
- Butter
- Cheese
- Desserts
- Ice-Creams
- Fermented Milk Products
- Flavoured Milk

Food & Beverages

- Food Emulations
- Baby Foods
- Fruits Juices
- Ketchup & Jam
- Honey
- Jelly
- Pet Foods
- Vegetables & Foods
- Tomato Products
- Stretches
- Egg & Mayonnaise

Chemical

- Chemical Slurries
- Clay
- Paints
- Latex
- Polymers
- Lubricants
- Inks & Resins
- Rubber
- Dyes
- Cellulose Fibres
- Fertilizers

Pharmaceuticals & Biotech

- Vaccines
- Syrup
- Tablets
- Yeast

Home & Personal Care

- Lotions
- Nail Varnish
- Hair Colorants
- Detergents
- Beauty Creams
- Shampoos
- Toothpastes

INCREASE THE LIFE OF YOUR EQUIPMENT

- ✓ Regular preventive maintenance and replacement of worn spares parts can extend the life of your homogenizer.
- ✓ Having the right homogenizer spares guarantee the fast & effective operation of the machine.
- ✓ In time replacement of worn spares can reduce the operation cost and increase operational efficiency.
- ✓ Homogenizers spares should be manufacturer of highly integrated CNC machines.
- ✓ Spares parts has to be maintained with proper tolerance and geometrical dimensions & tolerances.
- ✓ Spares parts has to be maintained with proper hardness and surface roughness.

PRODUCTS

Homogenizing Valve / Chamber

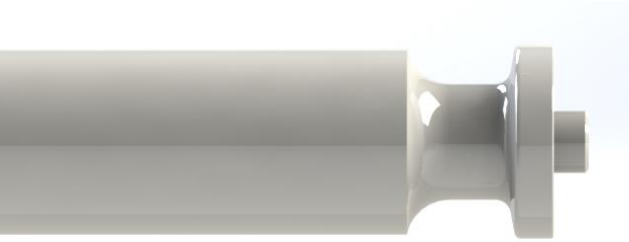

Special Features

- Chamber manufacturing from special grade forged steel.
- Homogenizing valve also supplied with impact ring, seats & impact head.
- Impact ring and seats manufacturing from special tungsten carbide materials.
- Impact valve manufacturer from hardened steel with tungsten carbide. Its special design can achieve high efficiency.

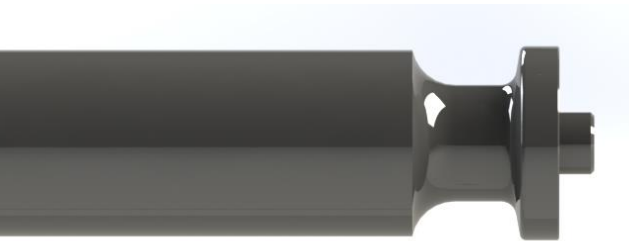

PRODUCTS

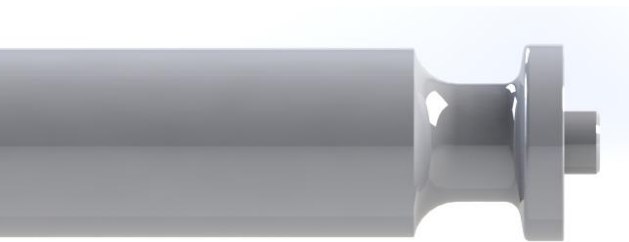

Plungers

Ceramic Plungers

Carbide Plungers

**Colominia 6 Coating
Plungers**

Special Features

- Available in various materials.
 - Ss304 with colominia 6 coating
 - Ss316 with colominia 6 coating
 - Solid ceramic
 - Solid tungsten carbide
- Microfluid maintain extremely good surface roughness values between 0.05 μm to 1 μm .
- Maintain hardness 70 HRC and above in colominia 6 and solid carbide plungers.
- Maintain all types of GD&T (straightness, concentricity and all parameters) for long life of components and homogenizer machines too and also inspect on CMM machine.

about CMM**

PRODUCTS

Valve & Valve Seats

Special Features

- Available in various materials.
 - Ss304
 - Ss316
 - Imported stellite (not Chinese)
 - Rex alloy
- Available different types of valve as per application requirements.
 - Poppet type valve assembly
 - Ball type valve assembly
- Provides hardened tungsten carbide ball.
- Appropriate hardness avoids early wear-tear in spare parts and decrease maintenance cost.

Poppet Type Valve

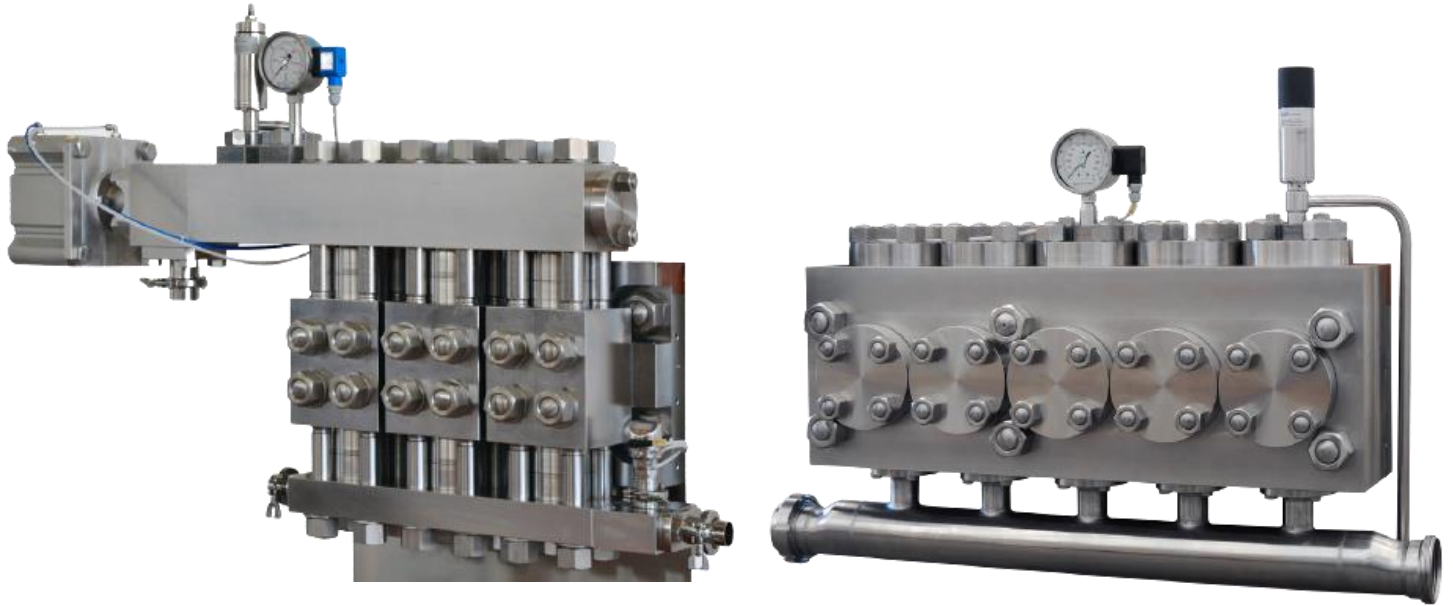

Ball Type Valve

**SPX Homogenizer
Valve Seat**

PRODUCTS

Cylinder Head / Fluid End / Compression Block

Special Features

- Available in various materials.
 - SS304 / SS304 L
 - SS316 / SS316 L
 - Super duplex material
- Supply forged cylinder head. Forged material can handle high temperature and avoid early wear-tear and reduce maintenance cost.
- Inspected chemical compositions and ultra-sonic testing.
- Maintain all types of GD&T (straightness, concentricity and all parameters) for long life of components and homogenizer machines too and also inspect on CMM machine.

about CMM**

PRODUCTS

Crank Shaft

Special Features

- Crankshaft made from forged alloy steel.
- Crankshaft processed with hardened & ground and heat treated process.
- Surface roughness maintains below 0.4 μm in pin are for long life of antifriction bearing.
- Raw materials inspected with chemical compositions and ultra-sonic testing process.
- Maintain all types of GD&T and PCD (pitch circle diameter) for long life of components and homogenizer machines too and also inspect on CMM machine.
- Accurate maintained dimension crankshaft improve the life of the machine and also improve life of connected parts like connecting rod and antifriction bearings.

**Read more
about GD&T**

**Read more
about CMM**

PRODUCTS

Connecting Rod / Antifriction Bearings

Special Features

Connecting Rod:

- Provides forged & casting connecting rod.
- Provided with accurate dimensions with all GD&T inspections.

Antifriction Bearings:

- Provides with pure white-metal materials.
- Pure white-metal material reduces frictions and improve accuracy and long life of the components and connecting rods.

PRODUCTS

Plunger Seals

Special Features

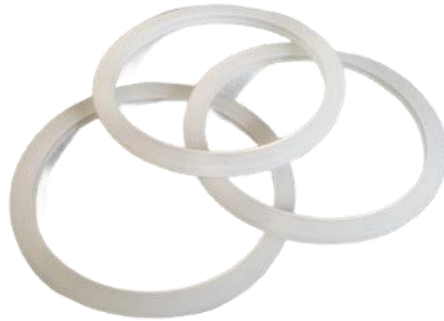

- Special food grade materials.
- Compatible with high-temperature around 80°C to 90°C. (so, increase life of seals and reduce maintenance cost.
- Available in all sizes.
- Quick delivery.
